Giardini dell'Arena, Padova

Looks of the neighbourhood

Come to discuss!

We want to debate which are the places where migrant's communities meet in Padova in order to make them more accessible. We start from the railway station to talk about the lack of spaces of encounter.

The railway station is a place where different migrant's community living in Padova as well as in the Province meet, talk and socialize. On the contrary the image of this neighbourhood is about criminality, unsafeness and fear. Due to the lack of spaces of encounter, the railway station is a meeting point but for many others is a place to avoid.

On these issues you are invited to contribute

Unesco Chair
